

DRX-Tray

WIRELESS-ON-DEMAND

DRX-Tray
WIRELESS-ON-DEMAND

Specifically designed for use with **Carestream** DRX Digital Technology

WIRELESS-ON-DEMAND

"ONLY WIRELESS WHEN YOU WANT IT"

By simply inserting the DRX digital panel into the DRX-Tray, it becomes instantly hard-wire connected (turning off wireless connection).

Quick-Connect Advantage: While switching from hard wired (in table or wall stand) to wireless (for table top / extremity work) the detector will make a transition from wired to wireless or vice versa in 2 seconds.

"TETHER-CONNECT":

Network Connectivity + Detector Battery Charger - All in One Step

The DRX-Tray utilizes "Tether-Connect" technology that enables the DRX detector to connect via hard wire to the system for all data communication. It also provides the detector with full operational power, eliminating the need to utilize the detector battery. In addition, it constantly charges the DRX battery, so it remains fully charged and ready when you remove the DRX detector for specialty exams. (This feature virtually replaces the need to manually charge-up the detector battery on a regular basis.)

The "DRX-Tray" delivers superior convenience use while streamlining daily operations.

DRX-Tray Specifications:

- Designed Specifically for the DRX Detector
- WIRELESS-ON-DEMAND Connectivity
- Includes "Tether-Connect" Technology
 - Enables DRX detector to connect via hard wire to the system for all data communication.
 - Provides the DRX detector with full operational power, eliminating the need to utilize the detector battery
 - Constantly charges the DRX battery, so it remains fully charged and ready when you remove the DRX detector for specialty exams. (This feature virtually replaces the need to manually charge the detector battery on a regular basis.)
- Digital Tray with "ROTATING Feature"
 - Allows for quick and controlled manual rotation of the digital receptor within tray
 - One handed manual rotation Portrait/Landscape in swivel based tray design
 - Tray locks provide for safe placement/removal of receptor
 - Locking tab secures the receptor within the tray
- Available for Radiographic Tables and Wall Stands

* Specifications subject to change without prior notice.

DRX Detector connects automatically via magnetic plug instantly when DRX panel is inserted

Shown DRX-Tray in wall stand during rotation

Quantum's DRX-Tray also provides a "rotational feature" inside the tray eliminating the need to remove the digital receptor from the tray when changing orientation. A light pull by the handle rotates the tray.
